Assessment when pupils have AI

AI · Level 4 · Lesson 3

Today we will

- Explain one step of our homework aloud, in our own words.
- Ask and answer “Why did you do it that way?”
- Say what explaining shows that a written answer can’t.

Remember

- Your thinking matters more than a finished answer.
- Explaining your steps shows what you really understand, and where you need help.
- If AI helped with your work, say how: honesty is part of the work.

Show your thinking

1. Warm-up (5 min): Show one maths answer with no working; ask how we know the pupil understood.
2. Model (7 min): Explain one step of a problem aloud while pupils ask you “Why?”.
3. Pairs (16 min): Each pupil explains one homework step for two minutes, then they swap.
4. Share (7 min): Three pairs tell the class what the question “Why?” revealed.
5. Wrap-up (5 min): Agree when we show our thinking, and how to say if AI helped.

Use homework pupils have already done, in any subject. There are no marks for this activity: it is about explaining, not catching anyone. Note common gaps for your next lesson.

Let’s discuss

1. When did explaining help you notice a mistake?
2. Why might a right answer with no working not show what someone knows?
3. If AI helped with homework, what is an honest way to say so?

Exit ticket

- One step I can explain well, and one step I need help with.
