Who decides what’s fair?

AI · Level 4 · Lesson 1

Today we will

- Ask five questions of any AI: fair, private, open, responsible, agreed.
- Explain why the values inside an AI are people’s choices.
- Describe the harm of deepfakes and of AI used to watch people, and what you can do.

Remember

- Working well isn’t the same as right to use: ask all five questions.
- Which mistake is worse is a value, and people choose it, so it can be questioned.
- Check before you share, never make or forward fakes, and report them.

The five-question debate

1. Warm-up (3 min): List three AIs that decide things about you or your family.
2. Five questions (6 min): Ask the five questions about one of them.
3. Prepare (6 min): Take sides on face recognition for attendance and plan your points.
4. Debate (8 min): Each side speaks for two minutes, then answers one question.
5. Vote (4 min): Vote, then each person says what would change their mind.

For a group of friends, a class or your family. You need paper and a pen; no phone is needed.

Let’s discuss

1. Which of the five questions matters most to you, and why?
2. Who should decide which mistake a school camera treats as worse?
3. What would you do if a fake voice note of a teacher reached your class group?

Exit ticket

- Name one AI you use, and one of the five questions it hasn’t answered for you.
