Privacy and school data: review

Cyber security · Level 3 · Unit check

In this unit

- Pupils’ data: collect less, protect more
- Apps, permissions and AI tools in class
- Social media, pupils’ photos and you
- When data goes wrong: handling an incident

The big ideas

- Collect only what you need, and keep it safe
- Check apps; keep pupils anonymous in AI tools
- Share the joy, not the details of a child
- Contain, report, assess, notify, learn

Safe, risky or an incident?

1. Warm-up (3 min): One word from each lesson.
2. Sort (12 min): Teams sort situation cards.
3. Explain (8 min): Each team defends two cards.
4. Fix (7 min): Rewrite the riskiest card.
5. Wrap-up (5 min): Exit ticket.

Write twelve short situation cards before the session, a mix of safe, risky and incident, from all four lessons. One set per team.

Let’s discuss

1. Which habit will you change first?
2. What would you tell a new colleague?
3. Which situation was hardest to judge?

Exit ticket

- One habit from this unit I will use this week.
