When something goes wrong

Cyber security · Level 1 · Lesson 4

In this lesson you will

- Recognise the signs of a hacked account.
- Take the recovery steps in order.
- Act fast after a scam, and keep evidence.
- Tell a trusted adult, and help a friend who was tricked.

Tell, take it back, report

- Tell a trusted adult, now
- Change the password, everywhere
- Two-step sign-in; sign out other devices
- Paid? Call the official number fast
- Never pay a “recovery” helper

What would you do?

1. Read (3 min): four problem cards
2. Order (5 min): the first three steps
3. Compare (4 min): with a partner
4. Plan (3 min): who you would tell

Use made-up names on the cards, and never real passwords or account numbers.

Think about it

1. Why is telling an adult the first step?
2. Why must the helpline number come from the official app or card?
3. How can you help a friend who was tricked?

Before you go

- My first three steps if I am hacked.
