Lesson plan · for the teacher

Designing and governing agents at school: unit check

AI agents · Level 4 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Design an agent for a school job
- Permissions and approval, in code
- Evaluate before you trust
- A school policy for agents

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which idea will you use first at our school?
- Which question surprised you, and why?
- What would you tell the head teacher about agents now?

Exit ticket

- One rule for agents at our school, and who will check it

Try it in class tomorrow

Pick the habit from this unit you need most (the fewest tools, approval checked in code, a test set, or the one-page policy), use it this week, and tell a colleague how it went.

Worksheet · for pupils

Designing and governing agents at school: unit check

AI agents · Level 4 · Unit check

Name _____ Class _____ Date _____

1 **An agent will only help pupils find library books. Which design follows least privilege?**

- ◯ All ten tools, so it never gets stuck
- ◯ The library tool only
- ◯ The library and send message, to tell parents
- ◯ The library and attendance, to know who is in school

2 **In a planner and checker design, the checker should also be a language model, so it can understand the call.**

- ◯ True
- ◯ False

3 **Which of these should wait for a person's yes before the agent acts? Choose all that apply.**

- ☐ A message to all parents
- ☐ Looking up tomorrow's timetable
- ☐ Booking the school hall
- ☐ Finding books on robots
- ☐ A reminder sent to a colleague

4 **Match each idea to what it means.**

Least privilege	• • • •	Requests with known answers, run after every change
Approval	• • • •	What was done, who approved it, and what was blocked
Audit log	• • • •	A person's yes to one exact action
Test set	• • • •	The fewest tools and the least data a job needs

5 **A company says its agent "always asks before sending". What should the school still require?**

- ◯ Nothing more: the model asks
- ◯ An approval check in code, for the exact action, and a log
- ◯ A longer, more polite question from the model
