Final project: train and test your own model

Train your own model: final project

The challenge

- Healthy or sick leaves from your street
- Ripe or unripe fruit at the market
- Neat or messy handwriting (with permission)

Your milestones

- Data first
- How a classifier decides
- Test it honestly
- Fair for everyone

Build it

1. Pick an idea and write the plan
2. Reuse your milestone work
3. Test it: where does it work, where does it fail?
4. Explain it to a partner in your own words

Let's discuss

1. What would change if one part of your project changed?
2. Where did it fail, and what did you change?
3. What would you build next?

Before you go

- One thing I understand now that I didn't before this project.
