Lesson plan · for the teacher

Confident, wrong and risky

AI security · Level 1 · Lesson 2

Time
40 min

Materials
A ladder with three rungs drawn on the board: low, medium, high; Five made-up AI answers on paper strips, from a poem to advice about medicine or chemicals; The textbook, to check one answer together

Learning goals

- Explain why a confident AI answer can be wrong.
- Place AI answers on a stakes ladder.
- Choose the right check, and who to ask.

Activity: The stakes ladder

1. Warm-up (5 min): Ask pupils about a time someone told them something confidently that turned out wrong. Agree that sounding sure isn't proof.
2. Teach (8 min): Explain that AI chatbots predict likely words, so they can be wrong and sound sure. Draw the ladder: low (read it), medium (the textbook), high (an expert, and a person decides).
3. Ladder (15 min): Read out five made-up AI answers: a poem about rain, a fractions quiz, a school-trip date, how to treat a burn, which cleaning products are safe to mix. Groups put each on a rung and write how they would check it.
4. Check it (7 min): Take the fractions quiz and check two of its answers in the textbook together. Point out one confident mistake if there is one.
5. Wrap-up (5 min): List the experts for high-stakes answers: the school nurse, the head teacher, the exam board. Then give the exit ticket.

Write the five answers on paper strips beforehand. Make the burn and cleaning answers clearly dangerous (for example “mix bleach and vinegar”), so pupils learn never to try them, and say so.

Discussion

- Why can an AI answer sound sure and still be wrong?
- Which answer was the hardest to place on the ladder?
- Who can you ask when an answer is about health or safety?

Exit ticket

- Write one AI answer that would be high stakes, and who you would ask to check it.

Try it in class tomorrow
Build a stakes ladder with your class: read out five AI answers, from a poem to advice about medicine. Groups place each one on a low, medium or high rung and say how they would check it.

Worksheet · for pupils

Confident, wrong and risky

AI security · Level 1 · Lesson 2

Name _____ Class _____ Date _____

1 **An AI drafted a letter to parents about the new exam rules. What do you do before it goes out?**

◯ Send it: it reads well ◯ Check every rule against the official notice ◯ Ask the AI if it's sure

2 **If two different chatbots give the same answer, you don't need to check it.**

◯ True ◯ False

3 **Which are high stakes, needing an expert or an official source? Choose all that apply.**

☐ Advice about a pupil's medicine ☐ Which chemicals are safe to mix in the lab

☐ A title for a class story ☐ The date of the national exam ☐ Ideas for a classroom display

4 **Put the checks in order, from the lightest to the strongest.**

☐ Let a person decide

☐ Ask an expert or the official source

☐ Check it against the textbook

☐ Read it yourself

5 **Complete the rule.**

The higher the _____ , the stronger the _____ .

Word bank: stakes · check · speed · price

✎ **Think of AI answers you or your pupils used this month. Which were high stakes, and were they checked?**
