Final project: attack and defend an AI helper

How AI is attacked and defended: final project

The challenge

- A homework helper that must never give answers to tests
- A club chatbot that can read members' emails
- A model your school downloads from the internet

Your milestones

- Filters that miss
- Only the tools it needs
- Poisoned data
- Check before you trust a model

Build it

1. Pick an idea and write the plan
2. Reuse your milestone work
3. Test it: where does it work, where does it fail?
4. Explain it to a partner in your own words

Let's discuss

1. What would change if one part of your project changed?
2. Where did it fail, and what did you change?
3. What would you build next?

Before you go

- One thing I understand now that I didn't before this project.
