Cleaning and organising data: review

Data engineering · Level 2 · Unit check

In this unit

- Tidy sheets a computer can use
- Names that agree
- Blanks, zeros and repeats
- One ID per pupil: joining sheets

The big ideas

- Raw data stays raw; summaries go on their own sheet
- Tidy, then match one master list
- A blank is not a zero; check every batch
- Join by ID, and question every gap

Team quiz

1. Teams (2 min): Make teams of four.
2. Quiz (20 min): Read each question; teams agree on one answer.
3. Explain (10 min): One team explains each answer.
4. Wrap-up (8 min): The hardest question goes on the board.

Let’s discuss

1. Which sheet in our school would you clean first?
2. What would a master list change for us?
3. Which check would have caught our worst mistake?

Exit ticket

- One cleaning habit I will use this week, and on which sheet.
