Final project: design a database and ask it questions

Databases and SQL: final project

The challenge

- The school library: books, students, loans
- A football league: teams, players, matches
- A class shop: items, sales, days

Your milestones

- Tables, keys and types
- Questions in SQL
- Joining tables
- Fast answers: indexes

Build it

1. Pick an idea and write the plan
2. Reuse your milestone work
3. Test it: where does it work, where does it fail?
4. Explain it to a partner in your own words

Let's discuss

1. What would change if one part of your project changed?
2. Where did it fail, and what did you change?
3. What would you build next?

Before you go

- One thing I understand now that I didn't before this project.
