Final project: an automatic helper for a real place

Make it automatic: final project

The challenge

- A plant waterer that doesn't flood the pot
- A classroom fan that switches on when it's hot
- A night light that saves its battery

Your milestones

- IF this, THEN that
- When should it switch?
- A device that remembers
- Power from batteries and the sun

Build it

1. Pick an idea and write the plan
2. Reuse your milestone work
3. Test it: where does it work, where does it fail?
4. Explain it to a partner in your own words

Let's discuss

1. What would change if one part of your project changed?
2. Where did it fail, and what did you change?
3. What would you build next?

Before you go

- One thing I understand now that I didn't before this project.
