What agents are, and when to trust them: review

AI agents · Level 1 · Unit check

In this unit

- From chatbot to agent
- What its tools allow
- When to trust an agent
- A person stays in charge

The big ideas

- A chatbot talks; an agent uses tools in a loop
- It acts only through the tools that are on: it should say so, or ask
- Check the call and the result, not how sure it sounds
- Reading is fine; acting needs a person’s yes

Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Let’s discuss

1. Which idea from this unit will you use first?
2. Which job at school would you never give an agent, and why?
3. How will you explain “ask first” to your pupils?

Exit ticket

- One habit I will use with agents, and when I will use it
