Ask clearly

AI agents · Level 2 · Lesson 2

Today we will

- Write a request with a goal, details, limits and what done looks like.
- Spot what an agent would have to ask or guess.
- Explain why a limit in words needs the app behind it.

Remember

- An agent acts only on what you write.
- A clear request: goal, details, limits, done.
- Missing details make it ask or guess; limits need the app too.

Vague to clear

1. Warm-up (5 min): Read a vague request aloud: what's missing?
2. Teach (8 min): The four parts, and the supply teacher's note.
3. Vague to clear (15 min): Pairs rewrite; the "agent" does only what's written.
4. Check it (7 min): Where did the agent ask, or guess?
5. Wrap-up (5 min): Vote for the clearest request, then the exit ticket.

Write five vague requests on the board before the lesson and make an "Agent" sign. No devices are needed.

Let’s discuss

1. Which part of a request do people forget most?
2. When is it better for an agent to ask than to guess?
3. Why isn’t “don’t send it” enough on its own?

Exit ticket

- Rewrite “Remind me about the meeting” so that an agent can’t get it wrong.
