One step at a time

AI agents · Primary school · Lesson 2

In this lesson you will

- Break a big job into small steps.
- Put steps in the right order.
- Stop and check when a step goes wrong.

Key ideas

- A plan is small steps in the right order.
- One step’s answer can help the next step.
- Find out first, then act; stop when a step goes wrong.

Activity: Mixed-up steps

1. Warm-up (3 min): Socks or shoes first? Find two more pairs.
2. Write (5 min): Five steps of a job, one per card.
3. Swap (7 min): A partner puts your cards in order.
4. Check card (5 min): Add where the job could go wrong.

Choose a safe job: ask a grown-up before using a kettle or a stove for real.

Let’s discuss

1. When does the order of steps matter most?
2. What should a helper do when a step goes wrong?
3. Which of your jobs at home has the most steps?

Exit ticket

- Write three steps of a job in order, and one place it could go wrong.
