Lesson notes · for you

Helpers that act: steps, tools and asking first: unit check

AI agents · Primary school · Unit check

Time	Materials
20 min	Paper and a pen. No device needed.

Learning goals

- A helper that does things
- One step at a time
- The helper's toolbox
- Ask first!

Activity: Activity: Helper rules poster

1. Warm-up (3 min): Write one rule from each lesson in your own words: tools, steps, the toolbox, and asking first.
2. Draw (10 min): Make a poster with the four rules, a small drawing for each, and one example from your own life.
3. Test (5 min): A partner describes a helper problem, such as "It wants to send a photo to the whole school". Point to the rule that solves it.
4. Share (2 min): Say which rule helped you answer, and which one you will teach at home.

Draw on any paper, and use made-up names on your poster.

Discussion

- Which helper rule will you use first?
- Which question surprised you, and why?
- How would you explain an agent to a younger child?

Check yourself

- My favourite helper rule + when I'll use it.

Try it this week

Pick the helper rule you like best (check with a tool, steps in order, "I can't" and asking, or ask first) and teach it to someone at home this week.

Worksheet

Helpers that act: steps, tools and asking first: unit check

AI agents · Primary school · Unit check

Name _____ Class _____ Date _____

1 **What makes a helper an agent?**

◯ It talks in a friendly way ◯ It uses tools to get a job done ◯ It writes long answers

2 **Put an agent's steps in order.**

☐ Answer from the tool's facts

☐ Use a tool

☐ Make a plan

☐ Listen to the question

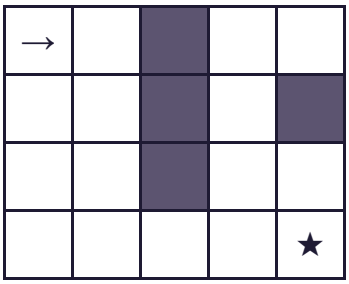

3 **A helper can use a tool it doesn't have, if you ask nicely.**

◯ True ◯ False

4 **Match each question to the tool that fits.**

Will it rain in Dala tomorrow?	• • • •	The reminder tool
How far is it to Sabo?	• • • •	The calculator
What is 9 × 8?	• • • •	The route tool
Remind me at 7:00 tomorrow	• • • •	The weather tool

5 **Program the robot, step by step, to reach the star.**

Cut out cards (↑ forward, ↶ turn left, ↷ turn right) and lay out a program that takes the robot to the ★. Write it here:
