Keep your secrets

AI security · Primary school · Lesson 3

In this lesson you will

- Name things you never tell an app, a game or a toy.
- Explain why an AI can repeat what it is told.
- Know what to do if an app asks for your secrets.

Remember

- Your words travel to a computer far away.
- An AI can remember and repeat what it learned.
- Secrets stay with you: ask a grown-up first.

Activity: Secret or OK?

1. Warm-up (3 min): Which apps or toys talk to you?
2. Sort (8 min): Put ten cards into “Secret” or “OK to share”.
3. Spot the trick (5 min): Read three messages that ask for secrets.
4. Share (4 min): Agree one rule with a partner.

Use made-up details only. Never write your real address or password on the cards.

Let’s discuss

1. Why might an app want your address?
2. Why can a secret come back out of an AI?
3. Which grown-up can you ask before using a new app?

Check yourself

- Write three things you will always keep secret from apps.
