Lesson notes · for you

AI-powered scams

AI security · Lower secondary · Lesson 2

Time
20 min

Materials
Paper and a pen; Your phone, or a family phone with its owner's permission (optional)

Learning goals

- Explain what AI changes about scams, and what it can't change.
- Beat copied voices and taken-over accounts with a second channel.
- Spot fake AI apps before you install them.

Activity: Activity: Scam or real?

1. Warm-up (3 min): List the scam signs you remember from earlier lessons: rush, prize, codes, strange links, bad spelling. Circle the ones AI can remove.
2. Sort (7 min): Read eight short messages (from your teacher or written by your group, all made up). For each, decide scam or real, and write which sign gave it away. Notice that perfect spelling doesn't help.
3. Plan (6 min): Write a three-line plan for your family: pause, check on a second channel or ask for the code word, never share codes. Don't write the code word itself.
4. Share (4 min): Swap plans with a partner. Improve one line of theirs, and explain why.

All messages are made up. Never write a real code word, a real number or a real account on the sheet.

Discussion

- Why doesn't a familiar voice prove who is calling?
- Who in your family would be easiest to trick, and how could you help them?
- Why is a scammer's request still the best clue?

Check yourself

- Write the three steps of your family's plan, and one sign of a fake AI app.

Try it this week
Agree a family code word at home, and decide together when to ask for it. Then check the apps on your phone, or a family phone with its owner: delete any you don't recognise or that ask for far more than they need.

Worksheet

AI-powered scams

AI security · Lower secondary · Lesson 2

Name _____ Class _____ Date _____

1 **A voice note sounds exactly like your uncle: he's stuck and needs mobile money now. What's your first move?**

- ◯ Send the money: it's his voice
- ◯ Call him on his usual number, or ask for the family code word
- ◯ Reply in the chat and ask him to prove it

2 **Which signs still help you spot a scam, even when AI wrote it? Choose all that apply.**

- ☐ It rushes or threatens you
- ☐ It asks for a code or a password
- ☐ It has a link to a look-alike site
- ☐ It has spelling mistakes
- ☐ The voice sounds strange

3 **A message that uses your name and your school must come from someone you know.**

- ◯ True
- ◯ False

4 **Match each situation to the habit that protects you.**

A voice note asks for money in a hurry	• • • •	Tell an adult and change your password
A “friend” asks for your sign-in code	• • • •	Use the official app store
A “free premium AI” app from a website	• • • •	Never share codes
You already sent a code	• • • •	Call back on the usual number

5 **Complete the rule.**

Verify on a _____ channel, and never share a _____.

Word bank: second · code · same · photo

✎ **Which AI scam do you think would be hardest for your family to spot: a copied voice, a perfect message or a fake app? What would protect them?**
