Repeat it: loops

Programming · Level 1 · Lesson 2

In this lesson you will

- Spot steps that repeat.
- Use a loop to make a program shorter.
- Count cards to find the shortest program.

Key ideas

- A loop says a step once, and how many times.
- Shorter, and easier to change.
- Loops are in songs, games and stairs.

Activity: Clap the loop

1. Warm-up (3 min): Clap “clap, clap, stamp” four times.
2. Write (7 min): Write it in full, then as a loop.
3. Create (7 min): Make your own pattern with a loop.
4. Share (3 min): A partner performs your loop.

No device is needed: hands, feet and paper are enough.

Let's discuss

1. Why is the loop easier to change?
2. Which songs or games have loops?
3. When would you not use a loop?

Exit ticket

- Write one thing you do again and again as a loop.
