Codes are keys

Cyber security · Level 1 · Lesson 3

In this lesson you will

- Explain how two-step sign-in works.
- Turn it on for email, WhatsApp or a game, with an adult’s help.
- Never share a one-time code.
- Keep backup codes safe, and know what a passkey is.

A second lock

- Know, have, are
- A code is for you alone
- A surprise prompt? Tap no
- Email first
- Backup codes on paper, at home

My account check

1. List (4 min): your accounts
2. Rank (3 min): which matters most
3. Check (5 min): which have two steps
4. Plan (3 min): one to turn on

Write account names only: never passwords, PINs or codes.

Think about it

1. Why does a thief want the code, not just the password?
2. What should you do about a prompt you didn’t start?
3. Where will you keep your backup codes?

Before you go

- One account, and the second step I will add to it.
