Pupils' data needs care

Data engineering · Level 1 · Lesson 4

Today we will

- Recognise personal and sensitive data.
- Practise the four habits that keep it safe.
- Decide what’s fine to share, what needs care and what stays private.

Remember

- Children’s data needs the most care.
- Collect only what you need; lock it; delete it on time.
- Share the task, not the child.

Fine, care or private

1. Warm-up (5 min): What does the school know about you?
2. Teach (8 min): Personal, sensitive, private.
3. Sort (15 min): Three piles, in groups.
4. Compare (7 min): Where did groups disagree?
5. Wrap-up (5 min): One habit to keep.

Use only made-up or general cards, never a real pupil's details. Be ready for sensitive questions about home or health: answer generally, and follow up privately if needed.

Let’s discuss

1. Which card was hardest to sort, and why?
2. How can small facts about you add up to find you?
3. What should a teacher do before posting a class photo?

Exit ticket

- Name one fact that’s fine to share, one that needs care and one that stays private.
