Keep, archive, delete

Data engineering · Level 4 · Lesson 4

Today we will

- Give every record a keep-until rule.
- Back up with 3-2-1, and test a restore.
- Archive in open formats, and delete on purpose.

Remember

- Keep it only as long as the purpose needs.
- 3-2-1: three copies, two kinds, one away.
- An untested backup is a hope.

Keep or delete?

1. Warm-up (5 min): What's in the cupboard?
2. Teach (8 min): Retention, backups, deletion.
3. Sort (12 min): Keep or delete?
4. Compare (10 min): Our rules and the real ones.
5. Wrap-up (5 min): Who tests the backup?

Find your ministry's retention rules before the lesson, if they exist. Use cards that name kinds of records, never real pupils' documents.

Let’s discuss

1. Which record should we keep the longest, and why?
2. Where is our away-from-school copy?
3. How do we know our backup works?

Exit ticket

- Write one record, its keep-until rule, the reason, and who deletes it.
