Lesson notes · for you

Predict with data: unit check

Data science · Level 3 · Unit check

Time
25 min

Materials
Paper and a pen. No device needed.

Learning goals

- Lines that predict
- Training and testing
- Nearest neighbours
- Judging a model

Activity: Revise in pairs

1. Pairs (2 min): Work with a partner and share one sheet for your answers.
2. Quiz (15 min): Read each question, agree on an answer and say why.
3. Check (8 min): Compare with the answers and redo the ones you got wrong.

Discussion

- Which idea will you use first?
- Which school model would you question?
- Which mistake costs most at your school?

Check yourself

- One prediction my class could test fairly this week.

Try it this week
Make a prediction about something in your week, test it fairly, and judge it by its mistakes.

Worksheet

Predict with data: unit check

Data science · Level 3 · Unit check

Name _____ Class _____ Date _____

1 **Use y = 6 + 3x.**

At x = 2 the prediction is _____.

Word bank: 12 · 9

2 **Predicting far outside the data's range is extrapolation.**

◯ True ◯ False

3 **Which score estimates performance on new data?**

◯ The test score ◯ The training score ◯ The best score after many tries on the test set

4 **Match each term to its meaning.**

Overfitting	• • • •	Share of flags that were right
Recall	• • • •	Share of real positives caught
Precision	• • • •	Low train error, high test error

5 **k = 5 neighbours: A, B, A, A, B. Prediction?**

◯ A ◯ B ◯ A tie
