Predict with data: review

Data science · Level 3 · Unit check

In this unit

- Lines that predict
- Training and testing
- Nearest neighbours
- Judging a model

The big ideas

- Predict inside the data
- Test on unseen data
- The nearest k vote
- Count both mistakes

Revise in pairs

1. Pairs (2 min): Find a partner.
2. Quiz (15 min): Answer together.
3. Check (8 min): Compare with the answers.

Let’s discuss

1. Which idea will you use first?
2. Which school model would you question?
3. Which mistake costs most at your school?

Exit ticket

- One prediction my class could test fairly this week.
