Draw the plans that fit

Optimization · Level 2 · Lesson 2

In this lesson you will

- Draw each limit as a line and shade the plans that fit.
- Find the best plan at a corner.
- See how a price change moves the best corner.

Key ideas

- Each limit: a straight line
- Plans that fit: the shaded shape
- The best: at a corner
- Used up, or to spare

Activity: The garden graph

1. Draw (8 min): Axes and the three lines.
2. Shade (4 min): Where all three are kept.
3. Corners (5 min): Profit at each corner.
4. What if (3 min): Tomatoes at 50?

Let one square be one bed. No graph paper? Rule squares on plain paper with a ruler.

Let’s discuss

1. Why is the best plan at a corner and not in the middle?
2. Why doesn’t extra water help, but extra hours would?
3. How would you share the garden work fairly?

Exit ticket

- Sketch the shaded shape and star the best corner.
