Lesson 3 · Good data, fair AI

Spot the data gap

Whose examples did the machine learn from?

Name _____
Class _____
Date _____

Work with a partner. Read each part and decide together.

1 True or false? Tick True or False for each sentence.

	True	False
a Gaps in examples can cause AI mistakes.	☐	☐
b A machine can never be unfair.	☐	☐
c More of the same examples fixes any gap.	☐	☐
d Testing with many groups helps find gaps.	☐	☐

2 What is missing? Read each set of examples. Write who or what is missing.

a. A fruit app learned only from mangoes and bananas. What is missing?

_____

_____

b. Voice typing learned from 1,000 men in one city. Who is missing?

_____

_____

c. A scam filter learned only from English messages. What is missing?

_____

_____

3 Match the words Draw a line from each word to what it means.

1 Bias	○ Every group is in the examples
2 Data gap	○ Finding who it gets wrong
3 Varied examples	○ Works worse for some people
4 Testing with groups	○ Examples leave some people out

☆ Challenge

A school wants a face app to take the register. Write two questions to ask before using it.

_____

_____
