Lesson plan · for the teacher

Is it AI?

AI · Level 1 · Lesson 1

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Tell AI tools apart from ordinary machines
- Explain that AI learns patterns from examples
- Say why AI can be wrong

Activity: Game: teach the machine

1. One pupil is the “model”
2. Show 8 cards labelled “fruit” or “not fruit”
3. Show 4 new cards — the model guesses
4. Discuss: were the examples enough?

20 minutes · no devices needed

Discussion

- Which apps on a phone might use AI?
- How could an AI tool get an answer wrong?
- Who checks that an AI answer is true?

Exit ticket

- Write one way AI could help our school
- Write one thing we should be careful about

Try it in class tomorrow

Play “teach the machine” with 12 paper cards: one pupil is the model and learns “fruit / not fruit” from examples.

Worksheet · for pupils

Is it AI?

AI · Level 1 · Lesson 1

Name _____ Class _____ Date _____

1 **Which of these learns from examples?**

◯ A light switch ◯ A spam filter in email ◯ A ruler

2 **Select all the tools that use AI.**

☐ Voice assistant on a phone ☐ Translation app ☐ Bicycle

☐ Keyboard that suggests the next word

3 **AI is always right because computers don't make mistakes.**

◯ True ◯ False

4 **Match each word to its meaning.**

Data	• • • •	A guess based on what was learned
Pattern	• • • •	Something that repeats predictably
Prediction	• • • •	Information a computer can use

✎ **Name one AI tool your pupils already use. How could you talk about it in class?**
