Lesson 2 · Reading numbers: units and scales

Reading detective

Number, unit, time, place — and read it level

Name _____
Class _____
Date _____

Work with a partner. Read carefully and answer.

1 True or false? Circle T for true or F for false.

	True	False
a “26” on its own is a complete reading.	☐	☐
b 30 °C and 30 °F are the same temperature.	☐	☐
c Read a scale with your eye level with the mark.	☐	☐
d A thermometer in direct sun can read higher than one in shade.	☐	☐
e Readings at 7 am and 2 pm make a fair comparison of two days.	☐	☐

2 Match the units Draw a line from each reading to what it tells you.

1 28 °C ○	○ 40 out of every 100
2 15 mm ○	○ When and where it was read
3 40 % ○	○ How hot or cold it is
4 8 am, school gate ○	○ How much rain fell

3 Think it through Answer in your own words.

a. A scale has 5 equal steps from 20 to 30. What is each step worth?

_____

_____

b. Why can’t you compare a 7 am shade reading with a 2 pm sun reading?

_____

_____

c. Rewrite “Rain: 12” as a full reading.

_____

_____

☆ Challenge

Plan a fair test: is the classroom warmer by the window or by the door? Say what you will keep the same.

_____

_____
