Lesson 3 · Build a rain gauge

Rain gauge builder

Build it, place it, read it in millimetres

Name _____
Class _____
Date _____

Work with a partner. Use what you learned today.

1 Build it in order

Number the steps 1–5.

- ☐ Tape a millimetre scale up from 0
- ☐ Place it in open ground
- ☐ An adult cuts the top off the bottle
- ☐ Put the top in upside down as a funnel
- ☐ Add stones and water; mark the 0 line

2 Good spot or bad?

Tick one box for each place.

	Good spot	Bad spot
a Middle of the open school field	☐	☐
b Under the big tree by the gate	☐	☐
c Under the edge of the classroom roof	☐	☐
d Open garden, far from walls and trees	☐	☐
e Inside the classroom by the window	☐	☐
f Open ground, held firm with stones	☐	☐

3 Read the gauge

Answer in your own words.

a. Why must the bottle have straight sides?

b. The water is 14 mm above 0. What do you write in the log?

c. Why do we pour it back to 0 after reading?

Challenge

Musa's gauge shows 20 mm. Zainab's, under a tree, shows 8 mm. Same rain. Explain the difference.
