Apps, permissions and AI tools in class

Cyber security · Level 3 · Lesson 2

Today we will

- Check an app or AI tool before using it with a class.
- Set app permissions to only what the app needs.
- Use AI tools without giving away pupils’ data.

Check, allow less, keep pupils anonymous

- Who makes it? What data? What age?
- Allow only what its job needs
- No names or health notes in AI tools
- Sign out of shared computers

Permission detectives

1. Warm-up (5 min): The quiz that wants contacts.
2. Teach (8 min): What a permission is.
3. Detectives (15 min): Four apps: which permissions?
4. Share (7 min): Groups compare and vote.
5. Wrap-up (5 min): Exit ticket.

Before the lesson, draw four simple app pictures on the board: a torch, a map, a quiz and a camera. Next to them, list five permissions: location, camera, microphone, contacts, photos.

Let’s discuss

1. Why would a free app want your contacts?
2. Which permission would you never give a game?
3. What should never go into an AI chatbot?

Exit ticket

- One app + the only permission it really needs.
