Lecture plan · for the lecturer

Science stand-ins, and one machine

University, scale 4

Time
45 min

Materials
A phone with Darsi; Paper for one hand-worked step; The slides from the kit

Learning goals

- Fast where it was tested
- Not the experiment

Activity: In the lab

1. Wide layer, both splits
2. Long batch, split the examples

Discussion

- What does a bigger machine not answer?

Exit ticket

- Wide layer: which split fits?

Try it in your next lecture
Refuse the bigger-GPU sentence in the first five minutes.

Seminar sheet · for students

Science stand-ins, and one machine

University, scale 4

Name _____ Class _____ Date _____

1 **A layer does not fit on one machine because it is wide. You…**

◯ Split the layer ◯ Only split the examples ◯ Store the activations as passwords

2 **A fast stand-in for a lab measurement is the experiment.**

◯ True ◯ False

3 **Match the split.**

Data parallel	• • • •	One machine, so this lab is a diagram
Model parallel	• • • •	Each machine holds part of the layer
One phone	• • • •	Each machine holds the whole model and some examples

4 **Order a decision about a wide layer.**

☐ Split the layer if that still does not fit

☐ Try splitting the examples

☐ Write the memory of one step

✎ **What formula must be on the board first?**
