A helper that does things

AI agents · Primary school · Lesson 1

In this lesson you will

- Tell a helper that only talks from one that uses tools.
- Say the steps: listen, plan, use a tool, answer.
- Play Helper and Tool with a friend.

Key ideas

- Some helpers only talk; agents use tools.
- A tool does one job, like the weather or sums.
- Listen, plan, use a tool, then answer from the tool’s facts.

Activity: Helper and Tool

1. Warm-up (3 min): Name three tools a helper could use.
2. Play (8 min): One asks, the helper plans, the tool answers.
3. No-tool round (4 min): The helper answers without the tool.
4. Share (3 min): What went wrong without the tool?

You only need paper, a pen and a timetable or calendar. No phone is needed.

Let’s discuss

1. Which helpers have you met that only talk?
2. Which tool would help you most at school?
3. Why should a helper answer from what the tool said?

Exit ticket

- Draw the four steps: listen, plan, tool, answer.
