The helper’s toolbox

AI agents · Primary school · Lesson 3

In this lesson you will

- Pick the tool that fits a question.
- Say what a good helper does with no tool, or a missing detail.
- Check what a helper filled in.

Key ideas

- A helper can only do what its tools can do.
- No tool? It says “I can’t”. A missing detail? It asks.
- Helpers can copy a detail wrongly: check it.

Activity: The toolbox game

1. Make (5 min): Six tool cards, one tool each.
2. Play (8 min): Ten questions: pick, ask or “I can’t”.
3. Swap (5 min): Change roles and play again.
4. Count (2 min): How often did each happen?

Use paper cards only. Ask about made-up places, like Kafi and Dala, not about real addresses.

Let’s discuss

1. Why is “I can’t” sometimes a good answer?
2. Which details does a weather tool need?
3. How can you tell that a helper copied something wrongly?

Exit ticket

- Write one question with no tool for it, and what a good helper says.
