Prompts that fit your class

AI · Level 2 · Lesson 2

Today we will

- Name the four ingredients of a good prompt.
- Add context that an AI tool could not guess.
- Predict how one ingredient changes an answer.

Remember

- An AI tool can’t see our class: a short prompt gets a typical answer.
- Role, task, context and format make a strong prompt; an example helps with style.
- If the answer is nearly right, follow up instead of starting again.

Prompt makeover

1. Warm-up (5 min): Give a volunteer a vague instruction and see what happens.
2. Teach (8 min): The four ingredients: role, task, context, format.
3. Makeover (15 min): Groups add one ingredient to a weak prompt.
4. Predict and compare (8 min): Groups share; test one prompt if you can.
5. Wrap-up (4 min): What did the AI need to know? Then the exit ticket.

Before class, give a chatbot a weak prompt, such as “Write questions about plants”, and copy its answer. Make one set of ingredient cards per group: Role, Context, Format, Example. No phone in class? Prepare an improved answer at home and read it out.

Let’s discuss

1. Why did the short prompt get such a general answer?
2. Which ingredient changed the answer most?
3. What should never go into a prompt, and why?

Exit ticket

- Rewrite “Make a quiz” with a role, context and a format.
