Lesson notes · for you

What is AI? Unit check

AI · Level 1 · Unit check

Time	Materials
45 min	Paper and a pen. No device needed.

Learning goals

- AI all around you
- How machines learn
- How AI sees
- When AI gets it wrong

Activity: Team quiz

1. Make teams of three or four
2. Read each question aloud; each team agrees on one answer
3. Reveal the answer and ask one team to explain why
4. Write down the question your team found hardest, and look it up in the lesson

Discussion

- Where will you look for AI tomorrow, and what will it be predicting?
- Which question surprised you, and why?
- What will you tell your family about this course?

Check yourself

- One idea from this course I'll remember, and where I'll use it

Try it this week

Explain one idea from this course to someone at home (AI predicts, machines learn from examples, pictures are numbers, or false alarms and misses), then ask them where they meet AI.

Worksheet

What is AI? Unit check

AI · Level 1 · Unit check

Name _____ Class _____ Date _____

1 **Which of these learns from examples?**

- ◯ A bus ticket machine that prints the fare for each stop
- ◯ A microwave that stops after two minutes
- ◯ A football app that predicts the winner from past results
- ◯ A school bell that rings at 7:30

2 **A chatbot that writes "I'm sorry to hear that" feels sorry for you.**

◯ True ◯ False

3 **Your cousin wants an app that tells ripe mangoes from unripe ones at her market stall. Put her steps in order.**

- ☐ Use it on new mangoes at the stall
- ☐ Try it on 50 new photos it never saw
- ☐ Let the computer find the patterns
- ☐ Mark each photo "ripe" or "not ripe"
- ☐ Take 300 photos of mangoes at the stall

4 **Why keep some labelled examples aside and never train on them?**

- ◯ To save space on the phone
- ◯ Because a model can only learn a few examples
- ◯ To make training faster
- ◯ To test whether the model learned the patterns

5 **Match each word to its meaning.**

Pixel	• • • •	The line a score must pass to raise the alarm
Label	• • • •	A best guess that can be wrong
Prediction	• • • •	The right answer attached to an example
Threshold	• • • •	A tiny square of a picture, stored as a number
