Lesson notes · for you

AI and society: unit check

AI · Level 4 · Unit check

Time	Materials
45 min	Paper and a pen. No device needed.

Learning goals

- Who decides what's fair?
- AI and the work of tomorrow
- Design an AI solution
- Test and pitch it

Activity: Team quiz

1. Make teams of three or four: friends, your AI club or family
2. Read each question aloud; each team agrees on one answer
3. Reveal the answer, and one team explains why
4. Write down the hardest question to revise tomorrow

Discussion

- Which of the five questions will you ask first about the next AI you meet?
- Which question surprised you, and why?
- What problem near you would you design an AI for, if it's needed at all?

Check yourself

- One idea from this unit I will use, and where

Try it this week
Choose one habit from this unit and use it this week: ask the five questions about an AI you meet, or show your one-page plan to someone who has the problem.

Worksheet

AI and society: unit check

AI · Level 4 · Unit check

Name _____ Class _____ Date _____

1 **A shop puts up a clear sign explaining that its cameras recognise returning customers. But customers can't say no, unless they stop shopping there. Which of the five questions does this fail?**

- ◯ Is it open: do people know what it does?
- ◯ Does it work as well for everyone?
- ◯ Did the people it affects agree?

2 **A deepfake that everyone can tell is fake does no harm.**

- ◯ True
- ◯ False

3 **Match each person to their part in AI work.**

Data labeller	• • • •	Checks AI-typed notes before they are used
Tester	• • • •	Builds the model and improves it
Engineer	• • • •	Tries a model on new examples to find its mistakes
Nurse	• • • •	Tags photos so a model can learn

4 **Which of these is augmentation, not automation?**

- ◯ A machine sorts parcels with nobody involved
- ◯ An app flags a possible crop disease, and the farmer decides what to do
- ◯ A spam filter deletes messages on its own

5 **Your club wants to design an AI helper. Which questions belong in its design plan? Choose all that do.**

- ☐ Whose problem is it?
- ☐ Is AI needed at all?
- ☐ What data, with whose permission?
- ☐ What happens when it's wrong?
- ☐ Which is the newest AI tool we could use?
- ☐ How much personal data can we collect, just in case?
