Fakes: voices, faces and messages

AI security · Level 1 · Lesson 3

Today we will

- Explain how AI fakes voices, faces and messages.
- Use a routine: pause, call back, code word.
- Respond well when a fake targets someone.

Remember

- Fakes are cheap, and glitches don't last.
- Pause, then check on a channel you already trust.
- Never forward a fake; care for the person and report it.

Pause and check

1. Warm-up (5 min): Has a message ever rushed you?
2. Teach (8 min): How fakes are made; the three-step routine.
3. Pause and check (15 min): Three urgent messages, read aloud.
4. Poster (7 min): Groups make a “Pause and check” poster.
5. Wrap-up (5 min): A family code word, then the exit ticket.

Make the messages clearly pretend, with made-up names, and never use a real person's voice or photo. If a pupil shares a real fake that hurt someone, follow your school's safeguarding procedure.

Let’s discuss

1. Why do fakes try to rush us?
2. Why is replying in the same chat not a real check?
3. What should we do if a fake picture of a classmate appears?

Exit ticket

- Write the three steps you take before acting on an urgent message.
