Real or fake?

AI security · Primary school · Lesson 4

In this lesson you will

- Explain that AI can make pictures, voices and messages that look real.
- Use stop, think, ask.
- Choose a family code word.

Remember

- Fakes can look and sound real.
- Stop, think, ask: don't rush.
- Never make or share a fake of a real person.

Activity: Stop, think, ask

1. Warm-up (3 min): Real or fake? Read three made-up headlines.
2. Act (8 min): One plays a scary caller; the other uses the habit.
3. Sort (5 min): Sort six message cards into real or scam.
4. Poster (4 min): Draw the three steps.

Use made-up names and stories only. Nobody shares real codes or passwords, even in the game.

Let’s discuss

1. Why are looks and spelling no longer enough to spot a fake?
2. How does a family code word beat a fake voice?
3. Why can a fake picture of a real person hurt them?

Check yourself

- Write the three steps of the habit, and when you would use them.
