Deepfakes and AI-made content

AI security · Lower secondary · Lesson 1

In this lesson you will

- Explain how AI fakes faces, voices and pictures.
- Check a suspicious post like a fact-checker.
- Know that detectors are clues, and never share fakes of real people.

Remember

- Glitches don't last: check the story, not just the picture.
- Four checks: the account, the original, a trusted report, who gains.
- Detectors are clues, not proof. Targeted? Save, report, tell.

Activity: Fact-checker's desk

1. Warm-up (3 min): Recall a post you weren't sure about.
2. Learn (5 min): The four checks on a card.
3. Check (8 min): Check three posts with a partner.
4. Share (4 min): Your verdicts, and how sure you are.

No phone? Ask your teacher for printed examples, or describe posts you've seen. Never forward a fake, not even to show it.

Let’s discuss

1. Why can't you rely on spotting glitches?
2. Which of the four checks is quickest on a phone?
3. Why is “Is this true?” in a group still a way of spreading a fake?

Check yourself

- Write your four checks from memory, and one thing you'll do if a fake ever targets you.
