AI-powered scams

AI security · Lower secondary · Lesson 2

In this lesson you will

- Explain what AI changes about scams, and what it can't change.
- Beat copied voices and taken-over accounts with a second channel.
- Spot fake AI apps before you install them.

Remember

- Perfect spelling and a familiar voice prove nothing.
- Verify on a second channel; agree a family code word.
- Codes are keys: never share them. Apps from the official store only.

Activity: Scam or real?

1. Warm-up (3 min): Which scam signs do you remember?
2. Sort (7 min): Eight messages: what AI changed in each.
3. Plan (6 min): Write your family's three-line plan.
4. Share (4 min): Swap plans and improve one line.

All messages are made up. Never write a real code word, a real number or a real account on the sheet.

Let’s discuss

1. Why doesn't a familiar voice prove who is calling?
2. Who in your family would be easiest to trick, and how could you help them?
3. Why is a scammer's request still the best clue?

Check yourself

- Write the three steps of your family's plan, and one sign of a fake AI app.
