When data goes wrong: handling an incident

Cyber security · Level 3 · Lesson 4

Today we will

- Recognise a data incident.
- Follow the five steps: contain, report, assess, notify, learn.
- Report early, and help others report without fear.

Five steps

- Contain: stop it spreading
- Report it the same day
- Assess, then notify
- Learn, without blame

Incident cards

1. Warm-up (5 min): The burst pipe.
2. Teach (8 min): Five steps.
3. Incident cards (15 min): First move, who to tell.
4. Share (7 min): Groups act it out.
5. Wrap-up (5 min): Exit ticket.

Before the lesson, write one set of incident cards per group: “Your phone is lost on the bus”, “You sent a class photo to the wrong group”, “Your game account is sending strange messages to your friends”.

Let’s discuss

1. Why does telling quickly keep the damage small?
2. Who would you tell at our school?
3. What could stop this happening again?

Exit ticket

- One incident + the first thing I would do.
