Incident drills: practise before it happens

Cyber security · Level 4 · Lesson 3

Today we will

- Run a 30-minute tabletop drill with colleagues.
- Give each person a role and practise it.
- Turn what the drill reveals into changes.

A drill in five parts

- A real story in three updates
- Four roles: lead, communications, technical, records
- One voice to parents
- Test the boring things: recovery email, backup, paper contacts
- Three lessons, three changes, no blame

Tabletop drill: the page taken over

1. Set-up (3 min): Hand out the four role cards; we test the plan, not people.
2. Update 1 (7 min): “7 am: the school page is selling cheap laptops.”
3. Update 2 (7 min): “8 am: parents paid a ‘fee discount’; nobody has the password.”
4. Update 3 (6 min): “10 am: a journalist calls, and the internet is down.”
5. Debrief (7 min): Three lessons, each with a change, an owner and a date.

Prepare four role cards, the three updates on separate sheets, and a sheet for the record keeper. Ask the head teacher to open the drill and say that nobody is being tested.

Let’s discuss

1. Where is the recovery email for our page, and who can reach it?
2. If the internet were down, where would we find the key phone numbers?
3. What should parents hear from us in the first hour?

Exit ticket

- One weak step the drill found, and the change I will make.
