Safe online: review

Cyber security · Level 1 · Unit check

In this unit

- Passwords nobody can guess
- Spot the scam
- Codes are keys
- When something goes wrong

The big ideas

- Long, random, different and secret
- Five warning signs: stop and check another way
- A code is a key for you alone
- Tell, take it back, report

Teach it back

1. Pick (2 min): one lesson
2. Prepare (5 min): three key points
3. Teach (5 min): a partner or family member
4. Swap (3 min): listen and ask

Examples only: never write real passwords, codes or account details on the card.

Think about it

1. Which habit have you already started?
2. Which one is hardest for you, and why?
3. Who at home could use what you learned?

Before you go

- The one habit I will keep from this unit.
