Pipelines, quality and governance: review

Data engineering · Level 4 · Unit check

In this unit

- Automate the weekly report
- Checks that catch problems
- Who may see what
- Keep, archive, delete

The big ideas

- Pipelines must be safe to rerun
- Checks return the bad rows; passing isn’t proof
- Each role, only what it needs; no group under five
- Keep on purpose, back up 3-2-1, delete on time

Team quiz

1. Teams (2 min): Make teams of four.
2. Quiz (20 min): Read each question; teams agree on one answer.
3. Explain (10 min): One team explains each answer.
4. Wrap-up (8 min): The hardest question goes on the board.

Let’s discuss

1. Which report would you automate first?
2. Who sees too much in our school today?
3. When did we last test a restore?

Exit ticket

- One change I will propose to our head this term, and why.
