What is data science?

Data science · Level 1 · Lesson 1

Today we will

- Say what data science is.
- Follow the loop: ask, collect, explore, explain.
- Turn a vague question into a measurable one.

Remember

- Data science answers questions with data.
- A good question is clear and measurable.
- Every answer leads to the next question.

From a guess to an answer

1. Warm-up (5 min): Why are some pupils late?
2. Teach (8 min): The four-step loop.
3. Count (15 min): Late arrivals by day.
4. Explain (7 min): Draw the bars and say what they show.
5. Wrap-up (5 min): What did we find out?

Use counts only; never show which pupil was late.

Let’s discuss

1. Which guess on the board did the data support?
2. What would we need to count to check the bus idea?
3. Which school question would you ask next?

Exit ticket

- Write one measurable question about our school, and the record that would answer it.
