Reading data safely

Data science · Level 1 · Lesson 4

Today we will

- Look inside groups before comparing averages.
- Ask what else could explain a pattern.
- Share results without exposing a child.

Remember

- Together is not cause.
- Small groups jump around.
- Share the class, never the child.

What else could explain it?

1. Warm-up (5 min): A surprising claim
2. Teach (8 min): Hidden groups and other explanations.
3. Check (15 min): Groups check one claim each.
4. Privacy (7 min): Safe or not?
5. Wrap-up (5 min): What did we find out?

Let’s discuss

1. What could explain the front-row pattern, apart from the seat?
2. Why is a class of eight risky to judge on one test?
3. How will you share the next test’s results?

Exit ticket

- Write one pattern from school life and one other thing that could explain it.
