Finding groups

Data science · Level 4 · Lesson 2

In this lesson you will

- Tell clustering from classification.
- Run k-means steps.
- Use groups with care.

Key ideas

- No labels needed.
- Nearest centre, then mean.
- A group is not a verdict.

Human k-means

1. Warm-up (5 min): Spot the groups
2. Move (10 min): Join the nearest centre.
3. Repeat (10 min): Move the centres.
4. Wrap-up (5 min): What did you find out?

Let’s discuss

1. Did anyone change group?
2. Does clustering need labels?
3. Why choose neutral names?

Exit ticket

- Centres at 3 and 10. Which centre does a pupil with 6 loans join?
