Is it AI?

AI · Level 1 · Lesson 1

Today we will

- Tell AI tools apart from ordinary machines
- Explain that AI learns patterns from examples
- Say why AI can be wrong

Rules or learning?

- Calculator: follows fixed rules written by people
- Spam filter: learned from thousands of examples
- AI makes a guess about something new

Game: teach the machine

1. One pupil is the “model”
2. Show 8 cards labelled “fruit” or “not fruit”
3. Show 4 new cards — the model guesses
4. Discuss: were the examples enough?

20 minutes · no devices needed

Let’s discuss

1. Which apps on a phone might use AI?
2. How could an AI tool get an answer wrong?
3. Who checks that an AI answer is true?
