A person stays in charge

AI agents · Level 1 · Lesson 4

Today we will

- Tell reading from acting.
- Approve only what we have read, and say no when unsure.
- Name what never goes to an agent.

Remember

- Reading is fine; acting needs a person’s yes.
- A model’s “I’ll ask first” can fail, so the app checks in code too.
- Passwords, private data and decisions about children stay with people.

Yes or no?

1. Warm-up (5 min): A message you wish you hadn’t sent.
2. Teach (8 min): Reading, acting, approval, and the check in code.
3. Yes or no? (15 min): Groups vote on six message cards.
4. Never hand over (7 min): Sort what a helper must never get.
5. Wrap-up (5 min): The agent proposes; a person decides. Exit ticket.

Write the six message cards before class with made-up names only: three fine, two with a hidden mistake, one with a private detail. Make YES and NO cards for each group.

Let’s discuss

1. Why isn’t it enough that the agent asks politely?
2. Which jobs would you set to Read only, Ask first or Allowed?
3. How will you teach pupils the “ask first” rule for helpers at home?

Exit ticket

- Write one action you would approve first, and one thing you would never give an agent.
