1. Project description

Why, what, the five milestones, how it is reviewed

You will

- Know why this capstone exists
- Plan about 16 hours across five milestones
- Open the starter template link when ready
- Next: Starter setup with screenshots

Do this

1. Read the five milestones and their hours
2. Spread about 16 hours over a few weeks, and write them in your calendar
3. Find a computer with internet (a school computer lab is fine)
4. Make a free GitHub account if you don't have one

Check yourself

1. Can I explain why this stage exists?
2. What do I open next?

Before you go

- One sentence: what this stage asked me to understand or do.
