Ask first!

AI agents · Primary school · Lesson 4

In this lesson you will

- Tell jobs that look things up from jobs that do things.
- Read a request before you say yes or no.
- Keep passwords and private things away from helpers.

Key ideas

- Looking things up is fine; doing things needs your yes.
- Read before you say yes, and no is always allowed.
- The app checks too, and passwords stay secret.

Activity: Yes or No

1. Warm-up (3 min): Sort five jobs: look, or do?
2. Write (6 min): Eight requests a helper might ask.
3. Play (8 min): Hold up YES or NO, and say why.
4. Share (3 min): Which trap was the hardest to spot?

Use made-up names and messages only. Never write a real password, even as a joke.

Let’s discuss

1. Which jobs can a helper do without asking?
2. Why is “no” always allowed?
3. What would you do if a helper did something strange?

Exit ticket

- Write one job that needs your yes, and one that doesn’t.
